

## HSNC UNIVERSITY, MUMBAI

## **Board of Faculty of Science & Technology**

Board of Studies in the Subjects of Statistics and Data Science& Business Analytics

- 1) NAME OFCHAIRPERSON/CO-CHAIRPERSON/COORDINATOR:-
  - a) Dr Asha Jindal, Associate Professor and Head of Department, Department of Statistics, K. C. college, HSNC University Churchgate, Mumbai –400 020. Email ID-<u>asha.jindal@kccollege.edu.in</u> Mobile no-9821235627
- **2)** TWO TO FIVE TEACHERS EACH HAVING MINIMUM FIVE YEARS TEACHING EXPERIENCE AMONGST THE FULL TIME TEACHERS OF THE DEPARTMENTS, IN THE RELEVANTSUBJECT.
  - a) <u>Dr. S. B. Muley</u>, Assistant Professor, Department of Statistics, K. C. college, HSNC University Churchgate, Mumbai 400 020. Email ID<u>sakharam.muley@kccollege.edu.in</u>, Mobile No-9323817918
  - b) Mrs.PratikshaKadam,Assistant Professor, Department of Statistics, K. C. college, HSNC University Churchgate, Mumbai – 400 020. Email IDpratiksha.kadam@kccollege.edu.in, Mobile No-7507162816
  - c) Ms.ShailajaRane, Assistant Professor, Department of Statistics, K. C. college, HSNC University Churchgate, Mumbai – 400 020. Email ID<u>shailaja.rane@kccollege.edu.in</u>, Mobile No-7506986359
- **3)** ONE PROFESSOR / ASSOCIATE PROFESSOR FROM OTHER UNIVERSITIES OR PROFESSOR / ASSOCIATE PROFESSOR FROM COLLEGES MANAGED BY PARENTBODY;
  - a) Dr AnjumAra Ahmed; I/C Principal, Rizvi College, Mumbai. Email ID<u>anjumahmed8@gmail.com</u>, Mobile No- 8451046220

- **4)** FOUR EXTERNAL EXPERTS FROM INDUSTRY / RESEARCH / EMINENT SCHOLAR IN THE FIELD RELEVANT TO THE SUBJECT NOMINATED BY THE PARENTBODY;
  - a. Prof. Suresh Kumar Sharma, Professor, Department of Statistics, Panjab University, Chandigarh.
    Email ID<u>ssharma643@yahoo.co.in</u>, Mobile No-9815911381

b. Mr Mukesh Jain, Chief Technological Officer, Capgemini. Email

IDmdjain@hotmail.com, Mobile No-7972637347.

- c. Dr Santosh Gite, Associate Professor, Dept. of Statistics, University of Mumbai, Mumbai. Email ID <u>santgite@yahoo.com</u>, Mobile No- 9167157717.
- d. Mr Prashant Kumar Nair, Director, GeoSpatial Analytics Global Lead, Intelligent Analytics, Nielsen Connect, Email IDprashantkumar.nair@nielsen.com, Mobile No-9833747057.

5. Top rankers of the Final Year Graduate and Final Year Post Graduate examination of previous year of the concerned subject as invitee members for discussions on framing or revision of syllabus of that subject or group of subjects for one year.

- a) **Ms.Mohaddasah Patel**(undergraduate student 18-19) EmailId-<u>mohaddasah.98@gmail.com</u>; Mobile no-9833781878
- b) **Ms.Divya Srivastava**(undergraduate student18-19) EmailID-<u>divyasrivastav20@gmail.com</u>; Mobile no-8879240305

### **B.Com. Honours Programme in Statistics**

There is always scope for improvement. Perfection is a moving goal. Improvement is measured through business results. There is an unknown improvement sequence that will bring best results in your unique business situation. Statistical Data driven approaches help in finding root causes of problems and fixing them permanently.

This Course is based on motto of learning while doing and is of 20 Credits. There will be Sic Semesters. Each Semester course work is of 3 Credits. Two Credits are assigned for Internship in Companies like Reliance, Accenture, CapGeminietc in R & D Departments. A 15days internship of one credit should be undertaken in any two semesters out of Sem III, Sem IV and Sem V only and two internship cannot be completed in single semester.

#### **Learning Outcomes:**

- i. Students will learn Statistics from basics concepts to creating basic models for predictions
- ii. Students will learn how Statistics is actually used large corporations like Microsoft, Jio, Amazon and other top companies globally
- iii. In the hands-on session, Students will gain skills on identifying opportunities for Analytics.
- iv. Students will acquire analytics skill needed for R & D for smooth run of any business.
- v. Students will learn to solve business problems using a structured approach to improve an Organisation's performance.

#### Semester I: Data Collection and Visualisation with MS-Excel

| Course Code |   | Title  | Credits                 |
|-------------|---|--|-------------------------|
|             |   | Data Collection and Visualisation with MS-<br>Excel  | 3 Credits<br>(45 Hours) |
| Unit I:     |   |  |                         |
| I.          | Installation<br>Installation of ad  | d-in <b>MegaStat</b> in Excel Library  | 2 Hours                 |
|             | and activation of   | DataAnalysis ToolPak.  | 3 Hours                 |
| II.         | Introduction, Data<br>Definition of Stat<br>Concept of Popu<br>Parameter and Sta<br>Types of data: Q            | a Types<br>istics, Application and scope of Statistics<br>ulation and Sample. Finite, Infinite Population,<br>atistic.<br>ualitative and quantitative data; Time series data   |                         |
|             | and cross section   | data, discrete and continuous data.  |                         |
|             | Different types of  | f scales: nominal, ordinal, interval and ratio.  |                         |
|             | Concept of popul  | ation and sample. Finite and infinite population   |                         |
| III.        | Primary data and  | Secondary Data   | 4 Hours                 |
| concep      | ot of a questionnair  | e and a schedule, Secondary data and Collection  |                         |
| IV          | Experiential Lear   | ninα   |                         |
| 1) D        | esigning of a quest   | ionnaire and/or a schedule   | 6 Hours                 |
| 2) Co       | ollection and Prepa   | aration of Excel Response sheet  |                         |
| Unit I      | I: Data Visualizat  | tion (15 Hours)  |                         |
| I.          | Introduction  |  | 2 Hours                 |
|             | The philosophy o<br>understanding the<br>how data analysis<br>A drill-down into                                 | f Data Visualization, Deconstructing and<br>e expression data visualization, Understanding<br>and visualization complement each other,<br>what constitutes data with examples  | 4.11                    |
| II.         | Experiential Lear<br>An analysis of a '<br>View", What mig<br>or samples What                                   | ning with Pivot Table<br>'data table'', The "Row View", The "Column<br>th interest a data analyst about rows i.e. instances<br>might interest a data analyst about columns i.e.  | 4 Hours                 |
|             | attributes or varia   | bles with suitable examples  | 2 Hours                 |
|             | Visualisation<br>Where does Data<br>The motive force<br>LOUDER THAN<br>variables that lead<br>analysis, Multiva | Visualization enter the frame of Data Analysis?,<br>behind visualization – A PICTURE SPEAKS<br>A THOUSAND WORDS, The interplay of<br>ds to visualization,Univariate analysis, Bivariate<br>ariate analysis and their visualization | 2 Hours                 |
| IV.         | The WHY, WHA  | T and HOW of Visualization   | 5 Hours                 |

|                  | Why visualize (what questions do we want visualization to           |         |  |
|------------------|---|---------|--|
|                  | answer), What is being visualized (the data)?, How should we        |         |  |
|                  | visualize (the various types of plots and graphs)                   |         |  |
|                  |   |         |  |
| V.               | Experiential Learning with Univariate Visualization                 |         |  |
| 1)               | Constructing and interpreting: Histogram, Pie chart, Bar chart. Box |         |  |
|                  | and Whisker plot, stem leaf diagram                                 |         |  |
| 2)               | Going beyond Univariate Visualization: Pareto Chart, Fishbone       |         |  |
|                  | Chart   |         |  |
| Unit I           |   |         |  |
|                  |   |         |  |
| I.               | Pair Plots, Bivariate Visualization                                 | 1 Hours |  |
|                  | visualizing the relationship of two variables, The cause-effect     |         |  |
|                  | relationship, Concept of X and Y variables, Concept of              |         |  |
|                  | independent and dependent variables, Choice of pair of variables,   |         |  |
|                  | which is X and which is Y, what questions will the combination      |         |  |
|                  | answer  |         |  |
|                  |   |         |  |
| II.              | The matrix of 4 combinations  | 1 Hours |  |
| $\succ$          | Categorical (X) vs Categorical (Y)                                  |         |  |
| $\succ$          | Numeric (X) vs Numeric (Y)  |         |  |
| $\succ$          | Categorical (X) vs Numeric (Y)                                      |         |  |
| $\triangleright$ | > Numeric (X) vs Categorical (Y)                                    |         |  |
|                  | -   |         |  |
| III.             | Experiential Learning with Bivariate Visualization                  | 9 Hours |  |
|                  | 1) The Grouped Bar chart, The Stacked Bar chart, Ogives,            |         |  |
|                  | Frequency Curve and Frequency Polygon                               |         |  |
|                  | 2) Going beyond Bivariate Visualization: Thermometer Chart,         |         |  |
|                  | Funnel Chart, Waterfall chart, Pyramids, Power Maps                 |         |  |
|                  | 3) The Scatterplot: Using the scatterplot for bivariate             |         |  |
|                  | visualization (two numeric variables),                              |         |  |
|                  | 4) More visualizations: Power Curve, Exponential Curve,             |         |  |
|                  | Logarithmic Curve, Pareto Curve and relationship with               |         |  |
|                  | Coefficient of Determination $\mathbb{R}^2$ .                       |         |  |
|                  | 5) Time series visualizations using the line chart                  |         |  |
|                  |   |         |  |
| IV.              | Infographics  |         |  |
|                  | Concept, Types, Experiential Learning for storytelling using Excel  | 4 Hours |  |
|                  | deshboard and infographics.   |         |  |
